

Screen

Frosted Acrylic

HL3740-001 200 x 200mm, with Foot

Description:

This small acrylic screen is for general optics in the classroom. The 'frosting' on one side is a fine sandblast that provides a good image. The simple foot is formed by a strong pin fixed through the acrylic to rest on the table on each side of the screen.

Fine frosted surface on one side used for optics and lenses and the the projection of images on a screen.

Length: 200mm	Width: 200mm	Thickness: 3mm	Weight: 150g
