

# Electrostatic Pith Balls

**EM1774-001**  
( Non Conductive ) (pk/12)

**EM1775-001**  
( Conductive ) (pk/10)

## Description:

A pack of electrostatic 'Pith Balls' for performing electrostatic experiments.

These pith pieces are approximately 'ball' shaped and are available either as plain pith or treated with a conductive coating.

Used for general electrostatic experiments. The conductive 'balls' carry the electrostatic charge all over their surface and the whole surface charges or discharges.

Physical Size: Approx. 8mm Diameter	Packed in Plastic Bag
