

## **EAR MODEL - large**

**Cat: BI 1190-01**

**DESCRIPTION:** An excellent, strong and resilient ear, brilliantly coloured and consisting of 5 separate pieces. Sections locate with strong and accurate metal pins for maximum strength.

**IDENTIFICATION:** Traditional markings on the component parts of a model generally deface the product and, over time, they usually disappear with handling. The parts of the Technos ear model are identified by using the full colour identification sheets provided with the model and this method makes study more effective regarding the memorising of the various parts of the model.

**Physical size: 320x160x205mm LxWxH**

**Weight: 1.35 kg**
