

Pulley In Sheave

Single, Double, Triple Or Quad

MF2560-001 Single

MF2570-001 Double

MF2580-001 Triple

MF2582-001 Quad

Description:

The IEC 'Pulley in Sheave' is a high quality and strong nylon pulley free running in a metal sheave. The pivot shaft is silver steel and the 50mm diameter pulley is moulded from low mass nylon. Friction is very low so that experiments remain accurate.

A very strong hook at each end permits the use of heavy weights without causing damage or distortion. The pulleys can be dismantled if any repair or changes to sheaves is required.

Other IEC pulleys include bench mounting, rod mounting.

Each Pulley	Diameter: 50mm	Depth: 12mm	Weight: 30g / Sheave
